EXSM 3932: Module 1 Assignment

Due Date: September 19, 2021 @ 11:59PM

Project Description

In this assignment, you will use the knowledge accrued during Module 1 to create a tribute page. Choose any figure that you find inspirational and create a basic HTML page about them!

Please submit your assignment in a ".zip" file (not .rar, nor .7z) containing your HTML file(s) and any images.

If you wish to go above and beyond the requirements of this project, you are welcome and encouraged to do so but please note that if you submit multiple pages, all pages submitted must fulfill the requirements in order to receive the marks indicated with an asterisk (*). Only one page is required.

W3C HTML5 Validator

The W3C Validator is a free service by W3C which checks over your HTML code to ensure that it is error free. It is an important tool to ensure better ranking on search engine results, proper display for all users, and to ensure that best practices are being implemented. In order to receive full marks, your HTML code must be cleared by the validator. The validator makes a separation between errors and warnings. **Errors** present in your submission **will result in a grade of zero for this assignment**.

Assignment Requirements (1 Mark Each)

- ☐ No W3C HTML validator warnings.*
- ☐ Page is structured (use of header, main, and footer to separate content).*
- ☐ Best practice use of headings (no skipping heading levels).*
- ☐ Main page is named correctly so that a web server will load it by default in the directory.
- ☐ Page contains a link to send you an email at your "@ualberta.ca" email address.
- ☐ Page contains at least one list.
- ☐ Page contains at least one image (local reference preferred, it must load).
- ☐ Content visible to the user in the browser is free of spelling and grammar errors.*
- ☐ Page has a title shown in the browser tab.*
- ☐ HTML is properly indented and readable.*
